LEARNING OBJECTIVES

• Expand your skills for selecting the best approach to effective treatment planning
• Gain a better understanding of the roles of each team member in delivery of care (surgeon, restorative dentist, lab)
• Understand the unique motivations of edentulous, partially edentulous and fully dentate immediate load patients for improved case acceptance
• Improve business knowledge that impacts the growth of your implant practice

PROGRAM DESCRIPTION

This comprehensive, two-day course delivers an effective team approach - surgical specialist, restorative dentist and laboratory partner – to full arch immediate load treatments. A live surgery and immediate fixed conversion will also be featured.

Treating Your Patients

This session covers topics such as choosing the right patients, the best approaches to treatment planning, the importance of digital technologies, and interpretation of CAT scans. Also included is a review of the indications and contraindications for bone level straight wall, tapered, and tissue level implants, minimizing chair time to optimize efficiency, restorative protocols at time of therapy, and simplified fabrication of the final prosthesis.

Treating Your Practice

This session focuses on the internal marketing of the treatment- conducted by the doctor, hygienists and staff – and how it impacts the business side of the practice. Participants learn to identify/attract new full arch cases, leverage the hygienists through patient recalls, streamline consultations to ensure acceptance, and ensure short and long term case acceptance. Additionally the course covers the concept of global fee structuring and innovative third party patient financing to close cases.

Speaker  Dr. Paul A Fugazzotto
Date       June 8 - 9, 2018
Location   The Fugazzotto Institute for Comprehensive Implant Therapy & Esthetics
            25 High Street
            Milton, MA 02186
